The Right Choice

Know-How Installed

It combines with 3 characters;
innovation, knowledge and integration.

Knowledge:
Know-How implies not only possessing knowledge,
but also putting it to work. Using it in our daily activities.
Making it count. Knowing what to do with what we know

Innovation:
It is based on EVOLUTION rather than REVOLUTION.
We continuously develop our products and systems
by making small changes that add up to big improvements.

Integration:
We use Know-How to create innovations that optimize synergy
and performance throughout the entire system.
The result is fast and easy-to-install, highly reliable,
integrated systems that set the standard for sanitary industry.

In everything Geberit does, there is Know-How Installed .

Geberit: Worldwide Leader in Sanitary Systems

Established worldwide

Geberit was founded in Switzerland in 1874. Today we are in the international market leader in sanitary technology with flushing technology as one of our core competences. Geberit operates sales offices in around 40 countries, with 17 specialized production sites in eight countries on three continents.

A strategic partner in sanitary technology

We take an innovative approach to product development that results in superior components that are an asset to any unit they are integrated into. We boast a wide product portfolio, which makes us the perfect OEM supplier for ceramics manufacturers.

Know-How Installed

Our business is built on three core characters - knowledge, innovation and integration - that together form our guiding concept: Know-How Installed. Knowledge refers to our ability to translate our expertise and innovative ideas into practical benefits.

Innovation drives everything we do - every small improvement contributes to an optimized bigger picture. Integration is key to our product approach, nothing we do is isolation. Every product is designed to maximize synergy and performance throughout the entire system.
